

Introducing Prowler Proof Protec...

Protec...smart security

Meet the latest member of the Prowler Proof family.

Protec is smart security. It's built in our hi-tech factory as an all-aluminium design with Prowler Proof's famous welded, seamless corners. The mesh is a single aluminium sheet, perforated and powder coated to the high standards you'd expect from Prowler Proof. The perforations are exactly the right size – small enough to keep insects out, big enough to allow excellent airflow and

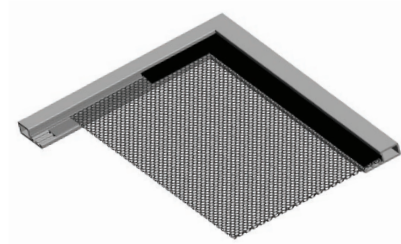

transparency. The mesh is joined to the heavy duty aluminium frame in a patented process, unique to Prowler Proof.

Protec is one of Australia's strongest and best looking security screens. The frame comes in over 300 colours to suit the black mesh. If you're looking for smart security, you can't go past Protec...

Protec has passed every test...

Protec is one of the strongest security screens on the market. The 6 separate tests in the Australian Standards security test (AS 5039) were all passed with ease. So was the 1,000 hour neutral salt spray test (AS 2331). Mosquitoes and other insects are kept outside thanks to the fine holes in the solid aluminium sheet. Only fresh air and daylight gets past Protec.

Protec's mesh is made from a single, solid 1.6 mm aluminium sheet. Secure, good looking and affordable.

Security tested	Corrosion tested	Energy efficient	Insect protection	Excellent airflow	Excellent transparency

Lock and manufactured options

Quality locks

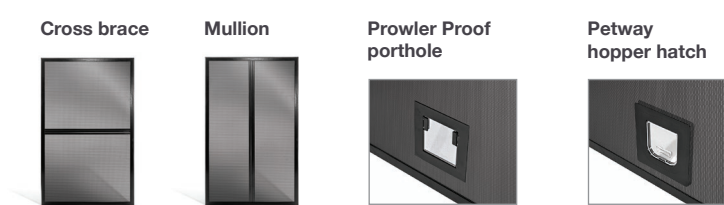

Lockwood 8653 and 8654 are among the strongest residential security door locks on the market. They feature a 3-point locking system with Kinetic Defence Keying Technology and a 25-year mechanical warranty. If security is not a priority, Protec is available with a 1-point lock that does not meet the Australian Standard AS 5039 for security.
